## PROCEDURE PAK™

## Procedure Pak Compression Stockings – Designed, Packaged and Priced Exclusively for Vein Practices

### CAROLON Health Support compression stockings:

- **Use the most technologically advanced fabrics.** Each compression class of our stockings uses a different weight of fabric for effective therapy and maximum patient comfort – specific fabrics for specific compressions.
- **Are shaped to fit.** Our stockings are knitted to conform to the leg shape and apply accurate and comfortable compression with unique “Floating Heel” technology.
- **Are easier to don and remove.** We combine the lightest weight fabric possible for a specific compression class with shaping to fit. This greatly enhances patient comfort and compliance.
- **Are available in a wide range of sizes.** A correct fit means comfort, patient compliance and effective therapy.
- **Offer certified compression.** Our Procedure Pak compression stockings are tested stringently in-house and certified for compression by an independent hosiery testing laboratory, HTC.\*
- **Are easy to care for.** Machine wash and tumble dry.
- **Are dispenser packaged & cost effective.** Save space and money dispensing stockings in singles or pairs.
